

Resident

Resident releases the iconic Geometric Series in Brushed Aluminum.

Resident is proud to be adding to its acclaimed Geometric lighting family, with the introduction of a Brushed Aluminum finish across five models.

The new finish is hand-brushed in New Zealand and now available on Hex 500, Hex 750, Hex 1000, Tri, Cross and Midnight Pendants.

The change comes into immediate effect, with Residents global warehouses already laden with stock.

The Geometric Series of lights have become synonymous with the Resident brand since their release in 2013. Harnessing LED technology with a vision to creating “shapes not shades”, these designs have been frequently installed and enjoyed in all corners of the globe.

Quote from Resident Co-Founder, Scott Bridgens

“ Residents Brushed Aluminum finish adds a new dimension to our lighting programme, and helps to further cement the Geometric Series as the go to option for original geometric lighting “
